

Santa Barbara Channelkeeper Press Conference

Monday, October 22nd, 9:30 AM

Sherry Madsen, Chair of the Santa Barbara Channelkeeper Board

The decision to undertake the legal and scientific review of this LNG terminal proposed for the Santa Barbara Channel represents a first and important step to protect the Channel and to ensure that unnecessary industrialization does not threaten its future health and well-being. For over 100 years, the Santa Barbara Channel has endured the impacts of offshore oil drilling and paid a steep environmental price. As an organization, we are committed to the Channel's protection and we ask the communities of Ventura and Santa Barbara to join us as we review and analyze a project that has the potential to change the future of the Channel for decades to come.

Thank you for coming. Now we will open it up for questions.
